[Philanthropy](#) Paul Valley 2020-09-17 The super-rich are silently and secretly shaping our world. In this groundbreaking exploration of historical and contemporary philanthropy, bestselling author Paul Valley reveals how this far-reaching change came about. Vivid with anecdote and scholarly insight, this magisterial survey – from the ancient Greeks to today's high-tech geeks – provides an original take on the history of philanthropy. It shows how giving has, variously, been a matter of honour, altruism, religious injunction, political control, moral activism, enlightened self-interest, public good, personal fulfilment and plutocratic manipulation. Its narrative moves from the Greek man of honour and Roman patron, via the Jewish prophet and Christian scholastic – through the Elizabethan machiavel, Puritan proto-capitalist, Enlightenment activist and Victorian moralist – to the robber-baron philanthropist, the welfare socialist, the celebrity activist and today's wealthy mega-giver. In the process it discovers that philanthropy lost an essential element as it entered the modern era. The book then embarks on a journey to determine where today's philanthropists come closest to recovering that missing dimension. Philanthropy explores the successes and failures of philanthrocapitalism, examines its claims and contradictions, and asks tough questions of top philanthropists and leading thinkers – among them Richard Branson, Eliza Manningham-Buller, Jonathan Ruffer, David Sainsbury, John Studzinski, Bob Geldof, Naser Haghamed, Lenny Henry, Jonathan Sacks, Rowan Williams, Ngaire Woods, and the presidents of the Rockefeller and Soros foundations, Rajiv Shah and Patrick Gaspard. In extended conversations they explore the relationship between philanthropy and family, faith, society, art, politics, and the creation and distribution of wealth. Highly engaging and meticulously researched, Paul Valley's authoritative account of philanthropy then and now critiques the excessive utilitarianism of much modern philanthrocapitalism and points to how philanthropy can rediscover its soul.

[On War and Democracy](#) Christopher Kutz 2020-04-28 On War and Democracy provides a richly nuanced examination of the moral justifications democracies often invoke to wage war. In this compelling and provocative book, Christopher Kutz argues that democratic principles can be both fertile and toxic ground for the project of limiting war's violence. Only by learning to view war as limited by our democratic values—rather than as a tool for promoting them—can we hope to arrest the slide toward the borderless, seemingly endless democratic "holy wars" and campaigns of remote killings we are witnessing today, and to stop permanently the use of torture and secret war. Kutz shows how our democratic values, understood incautiously and incorrectly, can actually undermine the goal of limiting war. He helps us better understand why we are tempted to believe that collective violence in the name of politics can be legitimate when individual violence is not. In doing so, he offers a bold new account of democratic agency that acknowledges the need for national defense and the promotion of liberty abroad while limiting the temptations of military intervention. Kutz demonstrates why we must address concerns about the means of waging war—including remote war and surveillance—and why we must create institutions to safeguard some nondemocratic values, such as dignity and martial honor, from the threat of democratic politics. On War and Democracy reveals why understanding democracy in terms of political agency, not institutional process, is crucial to limiting when and how democracies use violence.

[China's Domestic and International Migration Development](#) Huiyao Wang 2019-03-09 This book offers the most comprehensive, up-to-date assessment of China's domestic and international migration. Restructuring economic development requires large numbers of educated and skilled talents, but this effort comes at a time when the size of China's domestic workforce is shrinking. In response, both national and regional governments in China have been keen to encourage overseas Chinese talents and professionals to return to the country. Meanwhile, the Chinese government has initiated a number of policies to attract international highly-skilled talents and enhance the country's competitiveness, and some Chinese policies have started attracting foreign talents, who are coming to the country to work, and even to stay. Since Chinese policies, mechanisms, and administration efforts to attract and retain skilled domestic or overseas talents are helping to reshape China's economy and are significantly affecting the cooperation on migration and talent mobility, these aspects, in addition to being of scholarly and research interest, hold considerable commercial potential.

*2012 GCSE English results* Great Britain: Parliament. House of Commons: Education Committee 2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales

and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

**The Devolution Gambit** Tim Niendorf 2021-05-19 This book examines the increasing territorialisation of party competition and the relaxation of unitarian rule through devolution, presenting a long-term analysis of electoral developments in the United Kingdom since the end of the Second World War. Subsequently, the book looks into the undermining of the traditional majoritarian mode of British government as a result. It analyzes the significant role of these long-term developments and their detrimental effect on the parliament's ability to resolve issues like the Scottish Independence Referendum or the UK's vote to leave the European Union, and it addresses their underlying causes. The author additionally reconnects these electoral developments to the changing nature of devolution and shows how the deepening of devolution accelerates the negative electoral consequences for the British system of government. Finally, the book shows why the British Labour Party is turning more and more into a long-term minority party as a result of these developments. The book is a must-read for scholars, students and policy-makers, interested in a better understanding of comparative politics and devolution in general, as well as in the more specific case of the United Kingdom's electoral system.

**Media Law and Policy in the Internet Age** Doreen Weisenhaus 2017-02-23 The Internet brings opportunity and peril for media freedom and freedom of expression. It enables new forms of publication and extends the reach of traditional publishers, but its power increases the potential damage of harmful speech and invites state regulation and censorship as well as manipulation by private and commercial interests. In jurisdictions around the world, courts, lawmakers and regulators grapple with these contradictions and challenges in different ways with different goals in mind. The media law reforms they are adopting or considering contain crucial lessons for those forming their own responses or who seek to understand how technology is driving such rapid change in how information and opinion are distributed or restricted. In this book, many of the world's leading authorities examine the emerging landscape of reform in nations with variable political and legal contexts. They analyse developments particularly through the prisms of defamation and media regulation, but also explore the impact of technology on privacy law and national security. Whether as jurists, lawmakers, legal practitioners or scholars, they are at the front lines of a story of epic change in how and why the Internet is changing the nature and raising the stakes of 21st century communication and expression.

**The Sum of the People** Andrew Whitby 2020-03-31 This fascinating three-thousand-year history of the census traces the making of the modern survey and explores its political power in the age of big data and surveillance. In April 2020, the United States will embark on what has been called "the largest peacetime mobilization in American history": the decennial population census. It is part of a tradition of counting people that goes back at least three millennia and now spans the globe. In *The Sum of the People*, data scientist Andrew Whitby traces the remarkable history of the census, from ancient China and the Roman Empire, through revolutionary America and Nazi-occupied Europe, to the steps of the Supreme Court. Marvels of democracy, instruments of exclusion, and, at worst, tools of tyranny and genocide, censuses have always profoundly shaped the societies we've built. Today, as we struggle to resist the creep of mass surveillance, the traditional census -- direct and transparent -- may offer the seeds of an alternative.

**The Flight of Icarus** Yiannis Drossos 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis, focusing on the institution-building course of Europe and the Constitution-bending course in several Member States. It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis, arguing that the anti-crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance. The author carries out a critical analysis of the new economic governance and its case-law with regular reference to relevant political episodes, key economic figures and to the hitherto lax modes and rules. The author also offers deep insights into the Greek adjustment programme and the crisis-related Greek and Portuguese constitutional case-law, presented in comparison with the German and French case-law. The book concludes with a critical overview of the profound mutations in the role of national Constitutions, instigated by the new European economic governance, and the emergence of a democratically deficient meta-constitutional mode of functioning of both the European institutions and national Constitutions.

**Stateless Law** Helge Dedek 2016-03-03 This volume offers a critical analysis and illustration of the challenges and promises of 'stateless' law thought, pedagogy and approaches to governance - that is, understanding and conceptualizing law in a post-national condition. From common, civil and international law perspectives, the collection focuses on the definition and role of law as an academic discipline, and hybridity in the practice and production of law. With contributions by a diverse and international group of scholars, the collection includes fourteen chapters written in English and three in French. Confronting the 'transnational challenge' posed to the traditional theoretical and institutional structures that underlie the teaching and study of law in the university, the seventeen authors of *Stateless Law: Evolving Boundaries of a Discipline* bring new insight to the ongoing and crucial conversation about the future shape of legal scholarship, education and practice that is emblematic of the early twenty-first century. This collection is essential reading for academics, institutions and others involved in determining the future roles, responsibilities and education of jurists, as well as for academics interested in Law, Sociology, Political Science and Education.

*Decision-making in Foreign Policy and India-China Bilateral Relations* Raviprasad Narayanan 2021-11-29 Categorizing the centrality of foreign policy decision-making as being intrinsic to external relations, China and India are evolving new methodologies enriching the making of foreign policy. In comparison to works on China's foreign policy decision-making, India has not been studied much. *Decision-making in Foreign Policy and India-China Bilateral Relations* explains theoretical frameworks influencing decision makers with examples of the two countries and their decision-making regarding other countries and concerning issues with global impact. The book argues that climate change is a factor convincing both countries to look beyond established shibboleths. It shows how the United States and neighbours such as Taiwan and Sri Lanka are vectors influencing foreign policies with choices and options for decision makers to implement. It unravels the inconsistencies in the policymaking processes in both countries. Discussing cooperation and possible conflict in the India-China bilateral afresh, the book introduces a new perspective to discussion on foreign policy decision-making.

**Calendar of State Papers and Manuscripts, Relating to English Affairs** Rawdon Lubbock Brown 2013-05-06 This is the last volume in a seven-volume collection - published in nine parts between 1864 and 1890 - comprising Venetian and other northern Italian state papers relating to England. Translator and editor Rawdon Lubbock Brown (1806-83) lived for many years in Venice, had unrivalled access to the Venetian archives and travelled widely to find documents in other Italian libraries and archives. After his death, the work was completed by George Cavendish Bentinck (1821-91), who was a trustee of the British Museum and provides a preface to the documents assembled by his predecessor. Brown had previously published two volumes of Sebastian Giustinian's dispatches to Venice from Henry VIII's court (also reissued in this series). This seventh volume documents Venetian relations with England during the period 1558-80, the early part of Elizabeth I's reign. An index and a brief appendix of miscellaneous documents are also included.
