Austin-Healey Sprite Austin Motor Company, Ltd
195?

Austin Healey 100-6 & 3000 Graham Robson

2016-01-12 In nine eventful years - 1957 to 1965 - the six-cylinder-engined Austin Healey evolved into a formidable and increasingly specialised rally car. By any standards, it was the first of the "homologation specials" - a type made progressively stronger, faster, more versatile, and more suitable for the world's toughest International rallies. Though the motorsport foundations had been laid by the Healey Motor Co. Ltd, the work needed to turn these cars into rock-solid 210bhp projectiles was almost all completed by the world-famous "works" BMC Competitions Department at Abingdon. It was because of their vast experience that the "Big Healeys" as they were always affectionately known

- became fast and tough, nimble yet durable, so that they were capable of winning major events wherever traction could be assured. Not only did the "works" Austin Healeys win some of the world's most famous events - including Liege-Sofia-Liege, Spa-Sofia-Liege and the French and Austrian Alpine rallies, but they were also supremely fast on events like the Tulip, and came so close, so often, to winning their home event, the British RAC Rally, which traditionally ended the season. Not only did these cars turn their drivers - Pat Moss, Donald Morley, Rauno Aaltonen, Timo Makinen and Paddy Hopkirk among them - into heroes, but individual cars seemed to take on a character and reputation of their own. This book lists each and every success, each and every notable car, and traces exactly how the machinery developed, and improved, from one season to the next. Over time, the "works" cars not only adopted aluminium

cylinder heads and body panels, much-modified chassis, transmission and exhaust systems, but they also became supremely strong and could withstand a true battering on the world's toughest events. This book relates how the cars were improved by the engineers, how the drivers came to love their heavy and sometimes self-willed steeds, and how the management team got the most out of everything - machinery, personnel, drivers, and regulations. . Heavily illustrated and packed with technical detail this book will make a welcome addition to any motorsport fans library.

Frogeye Sprite John Baggott 2013-11-30 Frogeye Sprite - The Complete Story is the only book to have been written exclusively about the iconic Mark 1 Austin Healey Sprite. The book covers the full story of the design, development and manufacture of the Sprite, including the considerable success of the car in racing and rallying. Topics covered include: the car's racing success with drivers such as Stirling Moss, John Sprinzel, Paddy Hopkirk and Alec Poole; the special-bodied and bespoke grand touring

most user-friendly and comprehensive owner's workshop manual ever published for the 948cc, 1098cc and 1275cc series of Austin-Healey Sprites and MG Midgets. The contents of the original Clymer manual have now been reformatted into three separate sections appropriate to the three different engines that were used in this series of automobiles between 1958 through 1971. There is an engine/chassis 'Model Identification Chart' followed by a 'General Data' section that includes complete technical specifications for each model listed within the 'Model Identification Chart'. There are detailed instructions for the overhaul, service and maintenance of the major mechanical and electrical components for the 948cc, 1098cc and 1275cc engines. In addition, the 1275cc engine section includes comprehensive emission control information and test data. There are also additional wiring diagrams that were not included in the

original 1970 publication. Finally, there is a section on 'Increasing Power and Performance' that also includes detailed step-by-step instructions and illustrations for the installation of a Judson Supercharger. The reproduction of a factory handbook included in the original Clymer publication has been omitted due to the fact that there were numerous variations of the official BMC handbook that were issued during the production run of this series of automobiles. Therefore, it is recommended that this manual be used in conjunction with the 'Owners Handbook' that was issued with your automobile. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all 'Spridget' owners, restorers and enthusiasts worldwide.
