*Seven Myths About Education* Daisy Christodoulou 2014-03-14 In this controversial new book, Daisy Christodoulou offers a thought-provoking critique of educational orthodoxy. Drawing on her recent experience of teaching in challenging schools, she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles. She examines seven widely-held beliefs which are holding back pupils and teachers: - Facts prevent understanding - Teacher-led instruction is passive - The 21st century fundamentally changes everything - You can always just look it up -We should teach transferable skills - Projects and activities are the best way to learn - Teaching knowledge is indoctrination. In each accessible and engaging chapter, Christodoulou sets out the theory of each myth, considers its practical implications and shows the worrying prevalence of such practice. Then, she explains exactly why it is a myth, with reference to the principles of modern cognitive science. She builds a powerful case explaining how governments and educational organisations around the world have let down teachers and pupils by promoting and even mandating evidence-less theory and

bad practice. This blisteringly incisive and urgent text is essential reading for all teachers, teacher training students, policy makers, head teachers, researchers and academics around the world.

Where You Go Is Not Who You'll Be Frank Bruni 2015-03-17 Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring

manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In *Where You Go is Not Who You'll Be*, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

**The SAGE Handbook of International Higher Education** Darla K. Deardorff  
2012-08-20 The SAGE Handbook of International Higher Education examines the internationalization of

higher education from a marginal to a core dimension of higher education worldwide. This mainstreaming of internationalization is a fascinating phenomenon: new concepts, programs, providers, and methods of delivery are emerging; impressive national and regional scholarship programs have been established; radical reforms have been undertaken to make higher education globally competitive; and mobility of students and scholars has increased around the world. This groundbreaking handbook serves as a guide to internationalization of higher education and offers new strategies for its further development and expansion in the years to come. With a decidedly global approach, this volume brings together leading experts from around the world to illustrate the increasing importance of internationalization. The text encompasses the diversity and breadth of internationalization of higher education in all its thematic facets and regional impacts.
